

MORGAN M. RYAN, MA

UNIVERSITY INVOLVEMENT

Geography Representative (Graduate Student Association) August 2020-Spring 2021

- Created materials, including surveys, which sought to improve student life.
- Attended monthly meetings to vote on amendments to the GSA constitution.
- Served as a committee member on the Quality-of-Life Board.
- Collected student questions regarding UNL's handling of COVID-19 protocol.

Graduate Teaching Assistant (Geog 155, Geog 217, Geog 425): August 2019-Spring 2021

- Created GIS labs for a published Physical Geography Lab Manual.
- Adapted GIS labs for ArcGIS pro.
- Taught cartographic principles at the graduate level.
- Taught graduate and undergraduate labs using ArcGIS Pro and QGIS.
- Taught students Leaflet, ArcGIS API for JavaScript, D3.js, and many more JavaScript Libraries.
- Taught various basic and advanced GIS analysis methods at undergraduate and graduate levels.
- Created and ran a three-hour conference seminar using QGIS and Leaflet to produce Web Maps.

Gamma Theta Upsilon (Geography Honorary Society): Inducted Spring 2018

- Maintained 3.3 Geography GPA and 3.3 cumulative GPA
- Advocated for studying geography on campus.
- Collaborated with other GTU members to formulate beneficial extracurricular activities for students.
- Travel grant recipient (2020 National AAG)

COMMUNITY OUTREACH

Fit4Lincoln Educator: Norwood Park elementary and Elliott elementary 2016-2017

- Demonstrated the importance of eating healthy.
- Oversaw after-school P.E. programs for a combined total of sixty hours.
- Coached two classes of twenty children from diverse backgrounds.

RESEARCH EXPERIENCE

Reexamining The Desert: A Study Of Place-Based Food Insecurity: Published master's thesis

- Expanded the USDA's methodology of food desert identification
- Created new methods to Model food insecurity using place-specific variables.
- Performed a mixed-method analysis of food insecurity.
- Conducted fieldwork in the fifty-two grocery stores of Lincoln, Nebraska.

"What is Proper Place?": Perceptions of High Schools in Lincoln: A research project for Cultural Geography (Unpublished)

- Used QGIS to identify areas of risk in Lincoln.
- Statistical analysis of the correlation between poverty and race in Lincoln, Nebraska.
- Researched the impacts of poverty on place perception.
- Designed a survey to understand the perceptions of different high schools in the city.
- This work was presented at the Applied Geography Conference 2020.

EDUCATION

UNIVERSITY OF NEBRASKA-LINCOLN, LINCOLN, NEBRASKA

Master of Art in Geography, start, August 2019, graduation, May 2022

- GPA: 3.93
- Area of study: GISystems, web cartography, cultural geography, population geography, remote sensing, food insecurity, spatial access, health geography.

UNIVERSITY OF NEBRASKA-LINCOLN, LINCOLN, NEBRASKA

Bachelor of Science in Education, start, August 2014, graduation, May 2019 (Teaching certificate)

- Endorsement in Social Sciences, minors in Geography and History
- GPA: 3.45
- Dean's list: Spring 17, Fall 17, Spring 18, Fall 18, Spring 19
- Training in pedagogy, education psychology, technology integration in the classroom and critical thinking development.

WORK EXPERIENCE

PHILADELPHIA GAS WORKS, GEOGRAPHIC INFORMATION OFFICE,

800 W MONTGOMERY AVE, PHILADELPHIA, PA 19122

Senior GIS Analyst, Oct 2023 - Present, full-time 40 hours a week

- Automated data collection and cleaning processes using Python and JavaScript, enhancing GIS data accuracy and reliability.
- Managed and maintained the ESRI Enterprise GIS environment to ensure seamless data accessibility and cross-team collaboration.
- Designed and deployed ArcGIS Enterprise applications with Python and JavaScript, streamlining spatial analysis workflows.
- Supervised data collection and editing from technicians, upholding data quality standards and meeting tight project deadlines.
- Led a GNSS-enabled field data collection program, boosting spatial data precision and operational efficiency.
- Developed and maintained custom dashboards and web maps to support decision-making for multiple departments.
- Implemented GIS data quality audits and automated checks, reducing errors and rework in spatial datasets.
- Coordinated cross-functional GIS projects, supporting asset management, pipeline maintenance, and regulatory compliance.
- Automated repetitive tasks with Power Automate and scripting, saving time and increasing team productivity.

GEOGRAPHIC CONSULTING GROUP INTERNATIONAL,

203 E. HOWELL AVE, ALEXANDRIA, VA 22301

Solutions Engineer, July 2023 - Oct 2023, full-time 40 hours a week

- Developed Electric Utility Network models for U.S. military installations, aligning geospatial infrastructure with Esri's Utility Network standards.
- Designed and delivered presentation materials to advocate for Utility Network adoption across domestic and international military bases.
- Wrote custom Python scripts to evaluate GEOFidelis data model readiness for integration with the Esri Electric Utility Network framework.
- Led training sessions for analysts on implementing the Esri Utility Network, performing spatial analyses within the GEOFidelis schema, and designing geospatial applications for operational insight.

OFFICE OF THE CHIEF INFORMATION OFFICER, GEOGRAPHIC INFORMATION OFFICE,

501 S 14TH ST, LINCOLN, NE 68508

Senior IT Applications Developer, Jul 2022 - July 2023, full-time 40 hours a week

- Utilized Python and JavaScript to automate data processes for large datasets.
- Applied Pandas, Arcpy, and ArcGIS Python API for streamlined spatial analysis.
- Created Portal administration applications using PowerShell, Python, and JavaScript.
- Maintained SQL database for spatial analysis and developed business plans for GIS projects.
- Provided GIS support for Nebraska State Agencies.

DEPARTMENT OF NATURAL RESOURCES, FLOODPLAIN DIVISION,

301 CENTENNIAL MALL S, LINCOLN, NEBRASKA

Environmental Specialist I, Aug 2021 - Jul 2022, full-time 40 hours a week

- Conducted watershed-wide modeling for FEMA submissions and Base Flood Elevation analyses.
- Created technical reports on flood analysis methodology.
- Developed automated workflows for hydrologic analyses in GIS.

DEPARTMENT OF TRANSPORTATION, ROW OFFICE,

1500 NE-2, LINCOLN, NEBRASKA

GIS student intern, Jan 2020 – Aug 2021, part-time 25 hours a week

- Digitized ROW projects and ensured database integrity.
- Contributed to data quality initiatives as a member of the Data Standardization Board.
- Automated digitization of non-electronic files.
- Developed and provided GIS training for colleagues.
